PROFESSIONAL SUMMARY

React Native Developer with 3+ years of experience building scalable Android and iOS applications. Skilled in React Native, JavaScript, TypeScript, Redux, REST APIs, Firebase, payment integration, and location-based services. Experienced in performance optimization, third-party integrations, and delivering production-ready mobile solutions.

TECHNICAL SKILLS

Mobile Development:

React Native, React.js, TypeScript, JavaScript (ES6+), Expo, Android, iOS

State Management:

Redux, Redux Toolkit, RTK Query, Async Storage, Expo secure Store, useContext

Navigation & UI:

React Navigation, React Native Paper, NativeBase, Tailwind CSS, MUI, Shadcn/UI, Figma, Responsive UI Design, Component-Based Architecture

Backend & API:

REST APIs, Node.js, Express.js, JWT, MongoDB, Mongoose

Third-party Integration:

Firebase, Google Maps API, Stripe Payment, Push Notifications, GPS Services

Tools:

Git, GitHub, Android Studio, Xcode, Postman

Native Knowledge:

Java, Kotlin, Swift (Basic), Native Module Integration

PROFESSIONAL EXPERIENCE

React Native Developer

Betopia Group

May 2024 – Present

Project: Deligo Rider (Delivery Application)

Google Play Store: Published App

[Live link](#)

- Developed and maintained cross-platform mobile features using React Native.
 - Integrated REST APIs and collaborated with backend developers.
 - Implemented GPS-based tracking and distance calculation using Haversine formula.
 - Improved location accuracy and optimized application performance.
 - Debugged Android issues and enhanced application stability.
 - Built scalable features following clean code practices.
-

FULL CIRCLE Detailing – Car Service Booking Application

Google Play Store: Published App

[Live link](#)

- Developed a customer-focused mobile application for an auto detailing service business.
- Built appointment booking workflows and service management features.
- Implemented API integration for smooth data communication.
- Developed reusable React Native components for scalable UI development.
- Improved application performance, responsiveness, and user experience.
- Prepared and supported production release for Google Play Store deployment.

Technology:

React Native, TypeScript, REST API, Firebase, Android, Google Play Console

Kalamari – iOS Mobile Application

Apple App Store: Published Application

[Live link](#)

- Developed and maintained a production-level iOS application using React Native.
- Built reusable UI components and implemented scalable mobile architecture.
- Integrated REST APIs for seamless communication between frontend and backend services.
- Worked on application performance optimization and user experience improvements.
- Debugged iOS-specific issues and ensured application stability.
- Supported App Store release process and production deployment.

Technology:

React Native, TypeScript, JavaScript, REST API, iOS, Xcode

carme-app – Business Data Management Application

Platform: iOS (Apple App Store)

App Store: Published Application

[Live link](#)

- Developed a business-focused mobile application using React Native.
- Built features for accessing and managing business data from mobile devices.
- Integrated APIs for seamless communication between mobile frontend and backend services.
- Implemented reusable components and scalable application architecture.
- Improved application performance, responsiveness, and user experience.
- Supported iOS production release and App Store deployment process.

Technology:

React Native, TypeScript, JavaScript, REST API, iOS, Xcode

Software Developer

Waymarks

July 2022 – March 2024

Terminal – Contactless Payment Application

Technology: React Native CLI, Stripe, REST API

- Developed a tap-to-pay mobile application for contactless transactions.
 - Implemented authentication and payment integration.
 - Built reusable components and optimized application performance.
-

The Sanctum – Women's Health Application

Technology: React Native CLI, Redux, Stripe

- Developed health management features and user workflows.
 - Integrated APIs, authentication, and payment functionality.
 - Improved UI responsiveness and application experience.
-

PawsAndBuy – Pet Marketplace Application

Technology: React Native CLI, REST API, MongoDB

- Developed buyer and seller marketplace features.
 - Implemented authentication, product management, and shop creation.
 - Integrated backend APIs for real-time data management.
-

Audio Tour – Location-Based Application

Technology: React Native CLI, GPS, Push Notification

- Developed location-based audio notification features.
 - Integrated GPS services and push notifications.
 - Improved application reliability and user experience.
-

EDUCATION & CERTIFICATIONS

Harvard online: Introduction to Computer Science

Harvard University (Online) — In Progress

Complete Web Development Course

Programming Hero

July 2023 – December 2023

Diploma in Computer Science and Engineering

NYDASA

January 2000 – December 2003

SOFT SKILLS

- Problem Solving
 - Team Collaboration
 - Communication
 - Adaptability
 - Responsibility
 - Time Management
-

LANGUAGES

English — Professional Working Proficiency
